

Dear Committee Clerk,

Legislation (HB 5834) has been introduced to include gray wolves in the list of game animals in Michigan. It is my understanding that the Michigan Senate's Natural Resources will hold a hearing on the establishment of a game season for wolves in Michigan.

To include these wolves is unnecessary and the DNR should maintain its goal of ensuring the long-term survival of wolves in the state. Hunting wolves undermines that goal, and as such, there is no justifiable reason for making wolves a game animal.

Sincerely,

Lisa Marie Tabor
